

Service and Aftermarket 24 hours 7 days a week.

Hartmann ball valve after 30 years in the field.

Our service team broadly equipped at your disposal.

New from old: refurbished and repaired for another 30 years of usage.

- We support with well completions and shut-off-valves, repairs, maintenance, work and technical advice.
- We repair both our own and third party products.
- We weld with the latest technology as certified welding facility.
- We test leak tightness pressured with both liquid and gaseous media according to API, DGRL, DIN- as well as other standards.
- We rent tools and service equipment (e.g. nitrogen test unit, lubricator, compressed air casing cutter) along with our qualified service personnel and also wellhead components like debrining wellheads.
- We guarantee safety at work certified to SCC.
